

## Reactions to AAA eNewsbrief special issue 2 - March/ April 2020

### 1- Melanie and members of SI Tokyo-Shinjuku

Thank you very much for the life-saving directives against the spread of COVID-19 outlined in your AAA eNews Brief, Special Issue 2 March/April 2020. It is imperative that together we live with daily attention to the way we comport ourselves, and practice simple but essential hygiene practices. Washing our hands, covering coughs and sneezes, not touching our faces, staying home when feeling ill, finding other ways to lovingly greet each other, and keeping a 14-day supply of food and medication in the case of self-quarantine have indeed become practices that will help prevent the infiltration of the coronavirus.

We are grateful that AAA has been so involved in establishing and propagating a health plan that saves and improves the lives of many, especially as the world now confronts one of the greatest health challenges of its existence. With the help of organizations such as yours, and knowing that our health is literally 'in our hands', we send our appreciation and concern for all who come under your compassionate influence.

Be safe and healthy, We are all 'in this together'!

Highest regard,
