

## Reactions from AAA eNewsbrief August 2024

Dear Ruth,

Receiving and reading this very important AAA eNewsbrief for August 2024 emphasized the fact that whatever we do, no matter how small, has a tremendous effect on the world around us. If we choose our actions with mindfulness and care, we can be sure that waves of positivity will be sent out. Acting or thinking carelessly, however, can cause increasingly widespread difficulty for many.

AAA's teaching and inspiring young people by example and by providing instruments of sanitation and hygiene such as toilets, hand washing stations and community wells, instructs them from a young age to form successful habits throughout life that can help stem infectious disease and lead to health and wellbeing.

We are very proud and happy that SI Tokyo-Shinjuku has been given the opportunity to give the gift of clean water to communities pictured such as Abem and to know that this precious fluid and other AAA devices encouraging health and hygiene are influencing generations. Thank you, Ruth, for keeping the world mindful of its responsibility to be part of the solution, and to have us answer 'Yes!' to keeping our 'part of the world clean, healthy and safe for all.'

Melanie and members,  
SI Tokyo-Shinjuku

Dear Ruth,

It is wonderful that AAA is dealing with this issue, which - as I can see - does not only touch European countries, but also Africa. I feel privileged to live in Austria where the issue of garbage and dirt is being dealt with in a pretty efficient manner, but inspite of that there are still hundreds of people who do not use the provided facilities and generate dirt on a daily basis, injuring and violating our planet..

It is reassuring that AAA teaches small children to tackle this problem. Bravo!!!

best,

Herta
